

Annual Best Execution Disclosure 2017

Pursuant to its obligations under RTS28 of MiFID II, Eurizon SLJ Capital Limited (ESLJ) is required to provide an annual report summarising our analysis and conclusions drawn from monitoring the correlation between both order(s) placed with, or transmitted to a broker for execution; and the execution quality received by that broker during the previous calendar year (the, “Review Period”).

Execution Factors

When executing an order on behalf of a client, ESLJ will take all sufficient steps to execute the order in a manner designed to obtain the best possible results for the client on a consistent basis. ESLJ will consider the execution factors that they determine to be applicable and appropriate for a specific asset class when handling an order on behalf of one or more client accounts. The ranking of importance and appropriateness of each of the execution factors may differ on an order-by-order basis.

The execution factors include, but are not limited to:

- ability to execute
- price and related execution costs
- speed of execution
- settlement efficiency
- trading insight & market knowledge

Where appropriate, precedence will be given to the execution price as the primary execution factor in determining when, with whom and how to execute a client order. However price may not always be the primary factor. For example, for trading of more illiquid fixed income instruments, ESLJ will generally inform its decision making on the basis of runs in the first instance, rather than making multiple active inquiries due to implicit price risk.
